TimeControl Benefits

Challenge

You've got many users of Microsoft Project Desktop and your organization has already adopted SharePoint for collaboration. Now you need to create an collaborative project management environment.
The missing link?   *Time*.

Response

TimeControl was one of the earliest applications to link to Microsoft Project. We've had a link to Project since 1995. TimeControl can **also** be provisioned directly into SharePoint.
TimeControl becomes the integration point that allows you to use Microsoft Project and SharePoint and integrate timesheet data into a collaborative project environment!
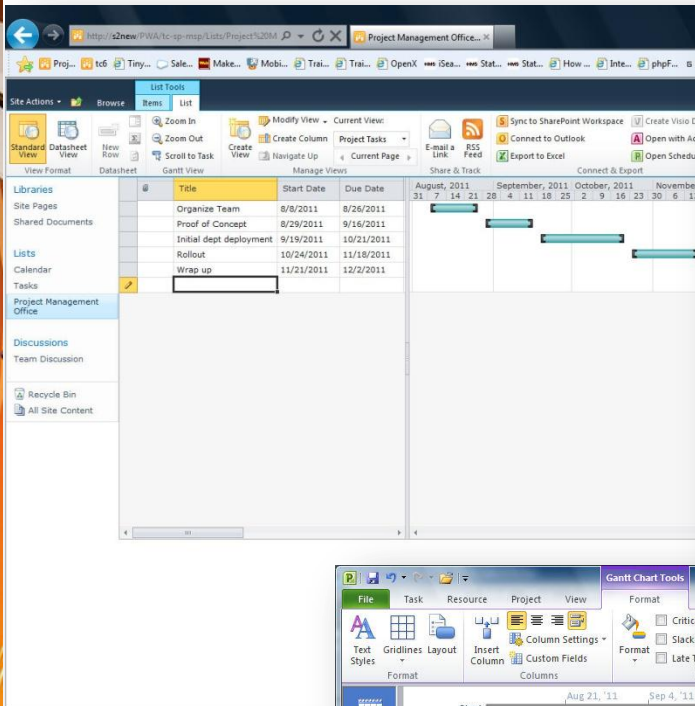

TimeControl is already integrated

- ✓ The architecture of TimeControl 6 is designed to integrate with SharePoint. You can optionally install the TimeControl interface directly into a SharePoint worksite.

- ✓ TimeControl already integrates with Microsoft Project Desktop.

- ✓ You can use TimeControl, Microsoft Project and SharePoint to create your own collaborative project environment.
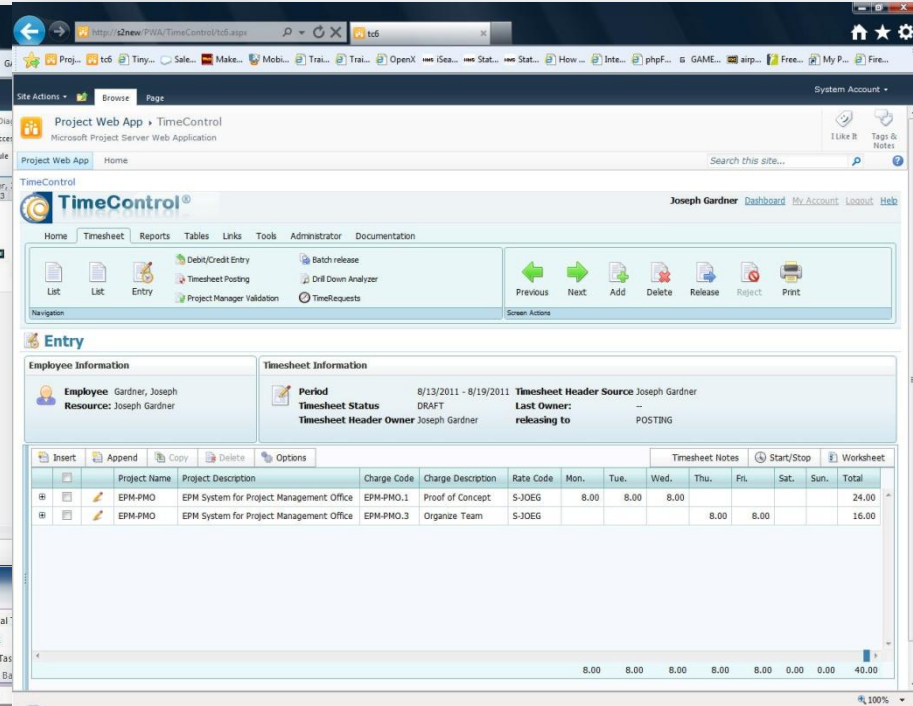

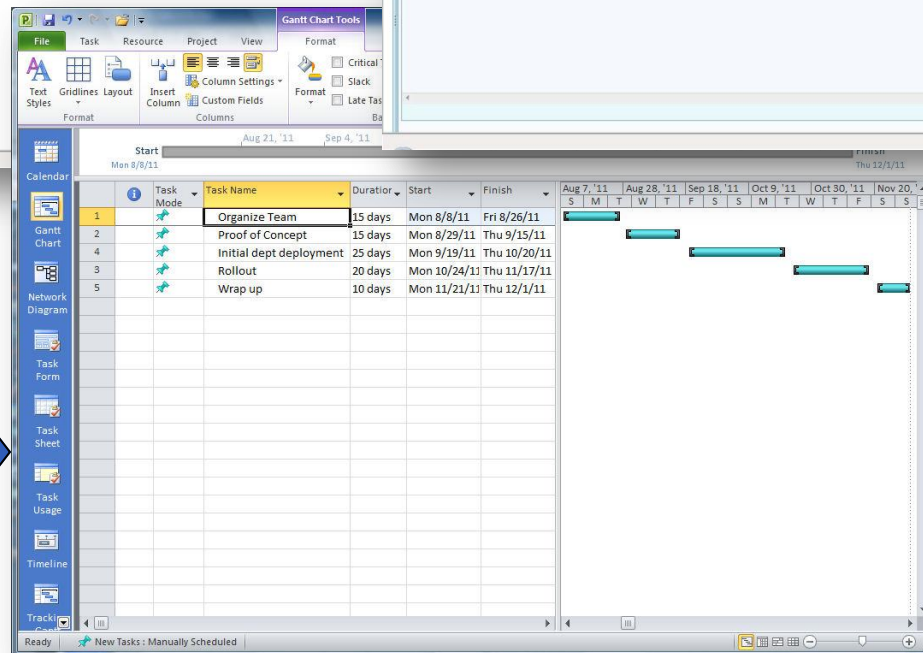

Demonstration

TimeControl, Project and SharePoint

TimeControl makes you more efficient

- ✓ TimeControl can make your organization more efficient by identifying where labor hours are being spent. It is no longer sufficient to know just how much is being spent on labor, in today's economy you must also know what it is being spent on.

- ✓ Having a reliable, timely and verifiable source of timesheet data for multiple purposes lets management make decisions based on what different activities are actually costing the organization.

Smartphone Support

TimeControl includes a Smartphone interface for:

- ✓ Blackberry
- ✓ iPhone
- ✓ Windows7 Mobile
- ✓ Android
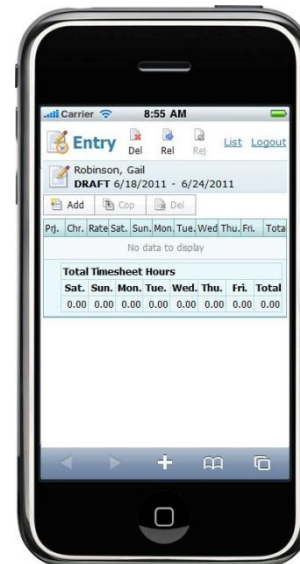

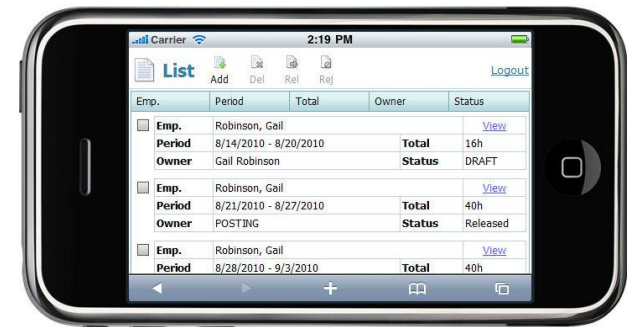

TimeControl Key Features

- ✓ Easy web interface
- ✓ **<u>and</u>** a mobile interface
- ✓ Multi-browser support
- ✓ Integrate to SharePoint
- ✓ Multilingual
